

PREPARED FOR EVENT & PRODUCTION AGENCIES

Premium LED, Rigging & Fabrication Partner for Your *Full Event Portfolio*

A strategic technical partnership framework built for agencies producing corporate functions, concerts, and exhibitions — delivering reliable LED deployment, structural rigging, and white-label execution at preferred B2B rates.

CORPORATE EVENTS

CONCERTS

EXHIBITIONS

① Objective & Core Value Proposition

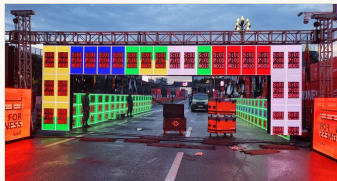

Vortex Visual aims to serve as your preferred technical LED equipment provider and full-service live production sub-rental partner. This proposal details how we integrate seamlessly behind your brand to execute high-stakes corporate functions, international summits, concerts, and exhibition launches with zero technical downtime — across screens, structure, and finish work.

② The Vortex Technical Edge

- **Hardware Reliability** — Robust, high-refresh-rate LED screen inventory, reliable receiving cards, and redundant backup video processing to prevent camera flickering, signal loss, or hardware failure during critical live broadcasts.
- **Seamless Configuration** — Full structural assembly and engineering, with clean cabling layouts, pixel-perfect modular alignment, and secure rigging or ground stacking for your specific venue and stage design.
- **On-Site Technical Expertise** — Every deployment includes a dedicated crew of technical operators and stagehands managing live content switching and real-time troubleshooting.
- **Live Content Switching** — Trained switching operators manage live camera feeds, presentation inputs, and playback sources — keynote transitions and panel cuts run without a visible seam.

③ Beyond Screens: Structural & Fabrication Capability

Most LED vendors stop at the screen. Vortex also covers the structure and finish work around it — fewer vendors for your agency to coordinate per event.

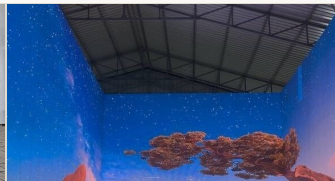

Truss & Rigging

Engineered truss for hanging LED walls, lighting, and speaker arrays — ground-supported or fly-rigged, load-checked for your venue.

MDF Fabrication

Custom MDF stage decks, set pieces, and branded structures — including bespoke exhibition booth builds.

Full-Stack Delivery

Screens, structure, and switching from one crew under one work order — reducing coordination overhead on site.

④ Sub-Rental Peace of Mind & White-Label Execution

To fully protect and elevate your agency's brand image, Vortex operates under a strict, professional white-label operational model.

- **Agency Representation** — Vortex crews, technicians, and stagehands conduct themselves with the highest degree of professionalism, adhering to your project timeline and site guidelines. On site, our crew acts as a direct, unbranded extension of your team.
- **Confidentiality & Client Protection** — We actively protect your client relationships and will not pitch services directly to, or circumvent your agency with, any end-client introduced through this partnership.

⑤ Built for Every Event Format

One partner, three event types — each with its own technical priorities, all covered under the same B2B framework.

		
Corporate & Summits Broadcast-grade reliability, discreet white-label crews, and live switching for keynotes and panels.	Concerts & Cultural High-refresh visual walls, rigged truss for scale, and fast load-in/out on tight show schedules.	Exhibitions & Launches Custom MDF booth builds and screen integration designed around product-reveal moments.

6 Commercial Alignment & B2B Tiered Pricing

We provide preferred financial structures to ensure your agency maintains healthy profit margins when incorporating Vortex equipment into your client proposals.

STRUCTURE	WHAT IT MEANS FOR YOUR AGENCY
Preferred B2B Loyalty Rates	A specialized, discounted rate sheet priced significantly lower than standard market retail rates.
Volume & Tiered Discounts	As cumulative booking volume increases, further tiered discounts unlock. Long-term activations or multi-day international summits receive customized project-based package rates.
Financial Budget Protection	Established B2B rates are locked and guaranteed for the duration of our seasonal collaboration, so you can confidently pitch and secure long-term project budgets with clients.

Combining LED, truss, and MDF fabrication under one B2B rate sheet also means one consolidated quote per event — simplifying your client-side budgeting instead of stacking separate vendor invoices.

7 Simplified Work Order Workflow

For every individual event, your agency issues a project briefing. Vortex quickly provides a technical configuration draft and a formal quote reflecting your preferred B2B pricing tier. Upon approval, a signed project work order secures the inventory and crew for execution.

01	02	03	04	05
Project briefing from your agency	Technical configuration draft	Formal B2B-tier quote	Signed work order	On-site delivery & crew

8 Why Partner With Vortex

- **Single point of accountability** — screens, rigging, and fabrication from one crew, one contract, one invoice.
- **Protected margins** — locked B2B rates let you price client proposals with confidence, season over season.
- **Brand-safe execution** — unbranded, professional crews that represent your agency, not ours, on site.
- **Format-agnostic** — the same partnership framework flexes across corporate, concert, and exhibition work, so your agency has one reliable technical vendor across its full event calendar.

Let's Build the Partnership

We're ready to discuss a seasonal B2B rate sheet tailored to your agency's projected volume across corporate, concert, and exhibition work. Reach out to schedule a technical walkthrough or request our full rate card.

Vortex Visual | Addis Ababa, Ethiopia | Cooperative Partnership Proposal

9 Selected Work

A cross-section of recent deployments spanning live screen production and corporate/exhibition builds — the same crew and framework behind every event type in this proposal.

SCREENS & LIVE PRODUCTION

Twilight outdoor concert — rigged LED screens & stage structure

Modular LED wall grid — event gateway & race-start structure

Large-format LED screens — CRAFT Addis Festival

IMMERSIVE LED ROOM

Immersive LED room installations — starfield/canyon and desert sunrise environments

CORPORATE, EXHIBITION & ACTIVATION BUILDS

Custom MDF sculpture set pieces — venue entrance build

Exhibition display & signage — hotel conference corridor

Brand activation build — "She Runs Addis" photo installation

City-wide signage & banner deployment — Addis Ababa Tourism Commission

Exhibition booth concept design — "Visit Addis Ababa" activation stand

Exhibition booth build in progress — branded structure & signage

Every image above was produced under the same white-label framework outlined in this proposal — Vortex crews on site, your agency's brand front and center.
